PROFESSIONAL SUMMARY

With 10+ years of experience, I'm a Software Engineer who loves building scalable, high-performance systems and driving innovation through modern technologies. I have designed and built systems that reliably **handle billions of requests**. I specialize in **backend heavy** fullstack development, building scalable APIs and services while delivering high-quality web applications. I have the capability to produce quality, production-ready applications by correctly using and properly orchestrating AI tools. I enjoy collaborating across teams and taking ownership of complex projects that push boundaries.

TECHNICAL SKILLS

- Ruby on Rails, Typescript, Nest.js, React.js, Next.js
- Kafka, Redis, RabbitMQ, Sidekiq, ArgoCD, Honeybadger, Circle CI, Datadog
- AWS (EC2, EBS, S3, RDS, Lambda), Cloudflare, Fastlane, Docker, Kubernetes, Elasticsearch, Kibana
- PostgreSQL, MySQL, MongoDB

EXPERIENCE

Senior Full Stack Software Engineer

Kajabi | Mar 2023 - Jan 2026 | 2 years 11 months

Tech Stack | Ruby on Rails, React.js,Typescript, PostgreSQL

- ***Cost Optimization*:** Optimized AWS RDS Aurora PostgreSQL instances using Reserved Instances during a hackathon event, achieving monthly infrastructure cost savings of **$180,000**.
- ***Build Workflow for BMA:*** Using GitHub Actions and Fastlane, developed an end-to-end build automation workflow using ruby on rails and python that automatically builds and publishes mobile apps for nearly 5 million customers to Apple and Google app stores. This solution reduced **operational costs by 48%** and shortened **the app release time by 80%**.
- ***Payment for BMA:*** Implemented native payment and subscription features via Apple and Google APIs for branded mobile apps, resulting in a **34% increase in product usage** and a **12% uplift in sales** for content creators after a 6-month complex backend development using ruby on rails.
- ***Custom Features for Engagement:*** Designed and implemented an App Builder Studio using react.js and typescript for branded mobile apps, enabling users to independently design their own apps, boosting user retention rates by **26%** and we had **GMV $5M** in 6 months.

Lead Full Stack Software Engineer

Superpeer, Inc. | Dec 2020 - Mar 2023 | 2 years 4 months

Tech Stack | Node.js, Typescript, Vue.js

- ***High Productivity:*** Rapidly analyzed competitors and delivered major features—Course Management, 1:1 Meeting Infrastructure, and Announcements—in just 2 months, resulting in a **17% revenue increase**.
- ***Take Ownership & Responsibility:*** Designed and implemented a new full-stack architecture within 8 months, trained the entire team, improving **engineering productivity by 30%** and **production cost by 51%**.
- ***Fostering Belonging:*** Led a team of 4 engineers to deliver all investment-critical web, backend and mobile backlog items end-to-end, and the company **raised $2M** in funding as a result.

Lead Full Stack Software Engineer

Epigra | Jan 2020 - Dec 2020 | 1 year

Tech Stack | Ruby on Rails, React.js, Typescript, PostgreSQL

- ***Architecture Modernization:*** Converted all existing client **projects (231)** to a domain-driven design (DDD) architecture, creating a scalable and maintainable foundation across the portfolio.
- ***ULive :*** Designed and built the ULive product from scratch with 3 engs, enabling the company to secure **$3M** in investment within 6 months.
- ***Technical Leadership:*** Provided hands-on technical guidance on architecture and implementation decisions, helping keep code quality and structure consistent across projects.

- ***Code Quality & Hiring:*** Reviewed pull requests and helped define coding standards to improve maintainability and reduce defects.

Senior Full Stack Software Engineer

My Next Match | Aug 2016 - Oct 2019 | 3 years 3 months

Tech Stack | Ruby on Rails, React.js, PostgreSQL

- ***Multi-Platform Product Development:*** Worked as a core engineer across backend services, the main web application, and mobile apps, ensuring a consistent experience for all users.
- ***Microservice Architecture at Scale:*** Designed and implemented a microservice-based architecture with **256 microservices** running smoothly in production, enabling teams to ship features independently and scale safely.
- ***End-to-End Delivery & CI/CD:*** Contributed to roadmap and sprint planning, reviewed critical pull requests, and helped manage CI/CD pipelines to keep releases frequent and stable.

Full Stack Software Engineer

JTI (Japan Tobacco International) (Siskon) | Mar 2014 - Jun 2016 | 2 years 4 months

Tech Stack | Ruby on Rails, React.js, PostgreSQL

- ***Internal Systems Development:*** Delivered multiple internal web applications for operations, sales, and reporting, from requirements through to production deployment.
- ***Architecture & Data Design:*** Designed database schemas and implemented backend architecture for both microservice-style and monolithic solutions.
- ***Full-Stack Delivery:*** Worked across client- and server-side rendered frontends, performed code reviews, and handled deployments to keep systems stable in production.

Software Engineer

Narkonteks Tekstil A.Ş. | Feb 2013 - Mar 2014 | 1 year 2 months

Tech Stack | Ruby on Rails, ASP.NET MVC, Javascript, MySQL

- ***Finance & Stock Systems Migration:*** Worked on migrating accounting and stock management processes from SAP into in-house applications, replacing external systems with internal solutions tailored to the company's workflows.
- ***Accounting & Inventory Domain Expertise:*** Gained strong hands-on experience in finance and inventory flows (invoicing, payments, stock movements, costing), ensuring the software matched real-world business rules.
- ***Internal Tools for Operations:*** Developed and maintained internal business and reporting tools used daily by finance and operations teams, helping them track production, inventory, and costs more accurately.

EDUCATION

Computer Engineering

Dokuz Eylul University in **Turkey**
